Electric Rate Decrease

**Effective December 1, 2018
Reflecting Effects of Tax Cuts
and Job Act of 2017**

On March 9, 2018, Montana-Dakota Utilities Co. (Montana-Dakota) filed an application with the North Dakota Public Service Commission (Commission) to update the Company's electric rates in response to the passage of the Tax Cuts and Jobs Act of 2017 (TCJA) effective January 1, 2018 and the Commission's Order Initiating an Investigation into the Rate Impact and Accounting Treatment of the TCJA as ordered on January 10, 2018.

On September 26, 2018, the Commission authorized an overall decrease in annual revenues of \$8.8 million or a decrease from current rates of 4.7 percent. On November 20, 2018, the Commission approved Montana-Dakota's updated electric rates reflecting the authorized decrease with new rates to be effective with service rendered on and after December 1, 2018. In addition to a decrease in the Company's electric rates, the Company's Environmental Cost Recovery Rider (ECRR) rates will be set to 0.000¢ per Kwh effective December 1, 2018. The average residential customer using 980 kilowatt hours a month will see a decrease of \$5.29 per month.

The Commission also authorized an electric rate refund plan for refunding 4.7 percent of the Company's revenues collected in 2018 through the implementation of new electric rates. Customers will receive a one-time bill credit on their electric bills no later than March 15, 2019, based on their January through November 2018 consumption. The bill credit will be shown as a separate line item on customers' bills and identified as "Tax Act Refund".
